### Compelling Question
How can you find the fractional part of another fraction?

### Standards and Practices
South Dakota Common Core State Standards for Mathematics.
- Practice 1: Make sense of problems and persevere in solving them.
- Practice 2: Reason abstractly and quantitatively.
- Practice 4: Model with mathematics.
- Practice 6: Attend to precision.
- Practice 7: Look for and make use of structure.
- Practice 8: Look for and express regularity in repeated reasoning.

### Staging the Question
How can we find the fractional amount of each nationality for a person?

### Formative Performance Task
Steps for solving multiplying a fraction by a fraction problem:
1. If there is a mixed number then convert to an improper fraction.
2. Multiply the numerators times each other.
3. Multiply the denominators times each other.
4. Simplify if the numerator and denominator are each divisible by a number other than one.
5. Change from an improper fraction to a mixed number if the numerator is larger than the denominator.

- If my mother is ½ Irish and my father is 1/8 Irish. What fraction Irish am I?
  1. What fraction of Irish do I get from my mother? ½ of ½ so multiply ½ x 1/2 = ¼.
  2. What fraction of Irish do I get from my father? 1/2 x 1/8 = 1/16.
  3. Now add the fractions together. ¼ + 1/16 = 5/16

- If my mother is ¾ Native American and my father is 1/8 Native American then what fraction of Native American am I?
  1. ¾ times ¾ from my mother = 3/8
  2. ½ times 1/8 from my father = 1/16
  3. Add 3/8 + 1/16 = 6/16 + 1/16 = 7/16
