

The Law of Nature - David Bald Eagle - OSEU 1

I'll tell you what I do believe in and see the past generations. During our life in the past generations, we realize, I realized, that the laws, the laws, regulations, religion, everything that was brought here. We're not used to that. We're used to the Indian way of prayers or life or ways of life. And we never were used to European laws, man made laws. These are man made laws that we could never understand. Our law, the Indian way of life, our law is the law of nature. And you never could go wrong in the law of nature. We know that without being written, we know that by heart. And we know that we know what's right and wrong. And like we always tell our children what is right and wrong in birth. Everything, everything that we do, there's a prayer for everything. We call it Oceti Sakowin. The reason we call it that is because you look up in the sky at night, there's a dipper that's got seven stars. Each star represents our seven campfires. That's our flag. Or the blue. Blue background. And so, we have that. And that's the meaning of our seven campfires. Each one has a dialect. We speak Indian together. We speak, but we each understand each other.
