

Recording Elders to Save the Language - Janelle Williams - OSEU 3

At this point, we are preserving. We are at that point now. I mean...we are in dire need. We do have a program at the tribe who do work with the elders. They are being recorded. On Mondays, the employees are able to go to the class. It's during lunch hour of course. We do have that option to attend. They have come up with a curriculum over at our local college to help anybody that's willing to learn and teach it within the schools.
